

MEGA SHOW

INDOOR STAGE REQUIREMENTS

STAGE PLOT DIAGRAM

Note: 17 ft deep x 50 ft wide is ideal, however set & prop staging is adjustable if you do not have that amount of space

MEGA SHOW

Technical Rider - Show Requirements

Audio/Video Requirements

- 2 wireless headset mics – for our emcee & co-emcee (if you don't have this, a handheld will work great too)
- 1 wireless handheld mic – for asking the crowd questions
- 1 sound system with a 1/8 inch audio input for our Macbook Pro
- 1 video system & screens with an HDMI connection for our Macbook Pro
 - Note: *Church Audio/Video technicians will not be responsible for our show cues. Our emcee's control all our audio and video cues via remote control from the stage using a professional remote system called Media Monkey.*
- 1 power outlet in audio/video booth for our Macbook Pro
- 1 power outlet or extension cord on stage

Stage Requirements

- Stage Size = We'd love to have at least 17 ft deep x 50 ft wide. But if that's not doable, no problem. We can accommodate whatever space you have. Our show staging is very adjustable.

Resources

- 1 private changing area for our mascot to dress near the performance space
- 1 large trash can with trash bag

Volunteers

- 4 adult helpers to assist with running a few games. We will need 5 minutes to prep them before the show.
- At least 5 adult helpers (*can be the same game helpers*) to participate in our "Musical Pies" skit (just a little shaving cream that wipes right off). It won't get on their clothing. We'll need 5 minutes to prep them before the show.
